

IN THE SPECIFICATION:

The specification as amended below with replacement paragraphs shows added text with underlining and deleted text with ~~striketrough~~.

Please REPLACE the paragraph beginning at page 5, line 5, with the following paragraph:

When a user wishes to make a phone call upon searching the telephone number of a counterpart, the user browses the web server 210 through the internet 250 using the web browser 200 (step 300). When the connection to the telephone web server 210 is completed by the web browser 200, a search screen of the telephone number web server 210 is displayed on the web browser 200. FIG. 4 shows an example of a search screen provided by the web server 210 so that the user inputs the proper search requests. In the present embodiment, the search screen includes two windows for inputting the name of a person or company and an address, and an additional window for inputting a keyword such as an E-mail address optionally.

Please REPLACE the paragraph beginning at page 6, line 14, with the following paragraph:

The telephone plug-in 230 connects to the telephone 240 with the selected telephone number using the same telephone line 260 (first telephone line) as that used to connect the information terminal with web browser 200 to the web server 210. That is, the information terminal with web browser 200 is not connected to the web server 210 while the telephone plug-in 230 is in use. Thus, the internet connection between the information terminal with the web browser 200 and the web server 210 is disconnected while the telephone plug-in 230 operates and dials a corresponding telephone number automatically and connects the telephone with the selected telephone number (step 380).

Please REPLACE the paragraph beginning at page 6, line 28, with the following paragraph:

However, if a second separate telephone line 270 is available, the telephone plug-in 230 may be operated using the second telephone line 270 while the information terminal with web browser 200 is connected to the web server 210 using the first telephone line 260. As a result, the use of a second telephone line 270 is optional according to the present invention.
